Add an Application ID URI

Managed application in local directory
ROPC-Test-App

State
Activated

Azure Active Directory Authentication Library (ADAL) and Azure AD Graph no longer receive new feature updates. We continue to provide technical support and security updates. Applications should be upgraded to Microsoft Authentication Library (MSAL) and Microsoft Graph. [Learn more](#)

Credentials enable confidential applications to identify themselves to the authentication service when receiving tokens at a web endpoint (using an HTTPS scheme). For a higher level of assurance, we recommend using a certificate (instead of a client secret) as a credential.

Application registration certificates, secrets and federated credentials can be found in the tabs below.

Certificates (0)

Client secrets (1)

Federated credentials (0)

A secret string that the application uses to prove its identity when requesting a token. Also can be referred to as application password.

+ New client secret

Description	Expires	Value ⓘ	Secret ID

Support + Troubleshooting

⚠ Granting tenant-wide consent may revoke permissions that have already been granted tenant-wide for that application. Permissions that users have already granted on their own behalf aren't affected. [Learn more](#)

ℹ The "Admin consent required" column shows the default value for an organization. However, user consent can be customized per permission, user, or app. This column may not reflect the value in your organization, or in organizations where this app will be used. [Learn more](#)

Configured permissions

Applications are authorized to call APIs when they are granted permissions by users/admins as part of the consent process. The list of configured permissions should include all the permissions the application needs. [Learn more about permissions and consent](#)

+ Add a permission ✓ Grant admin consent for Default Directory

API / Permissions name	Type	Description	Admin consent req...	Status
Microsoft Graph (4)				
email	Delegated	View users' email address	No	✓ Granted for Default Dire...
offline_access	Delegated	Maintain access to data you have given it acc...	No	✓ Granted for Default Dire...
openid	Delegated	Sign users in	No	✓ Granted for Default Dire...
User.Read	Delegated	Sign in and read user profile	No	✓ Granted for Default Dire...

To view and manage consented permissions for individual apps, as well as your tenant's consent settings, try [Enterprise applications](#).
